VALUABLE OIL LEASE FOR SALE

FOR SALE—A 500-acre OIL AND GAS LEASE

In Powell County, Kentucky.

Has one it one producing oil well, with room for one hundred more. Well is rigged up for pumping, with gasoline engine, tank, etc., all of which goes with lease. Entire tract is level, accessible, and right on railroad. Producing oil wells on adjoining farms, and on all sides. The potential value of this property is evidently very great. TRY THE OIL GAME—YOU MAY WAKE UP TO FIND YOURSELF A MILLIONAIRE. THIS IS NOT AN UNUSUAL OCCURRENCE IN THE SHALLOW OIL FIELDS OF KENTUCKY. For appointment, address Box 240, Lexington, Ky.

KY. FIELD REPORT

FOR JANUARY

There was a heavy falling off in completed work, new production, dry holes and gas wells in the Kentucky-Tennessee fields during January, says the Oil City Derrick. The month shows 160 wells completed, with a new production of 7,055 barrels, 13 dry holes and eight gas wells, against 260 completed wells, 10,166 barrels new production, 28 dry holes and 16 gas wells for December. This is a decrease of 91 in completed wells, 3,111 barrels in new production, 15 in dry holes and eight in gas wells, but this was expected on account of the bad weather that prevailed during the earlier part of the month, and the absence of drillers and laborers throughout the fields that had not returned from their holiday vacation.

The feature of the January report is the great increase in new development work which goes to show that the oil trade is alive as to activity. At the close of January there were 24 rigs up and 47 wells drilling at the close of December, being a net increase in new work of 50.

Lee and Allen counties are far in the lead of all others and there is slight chance of any of the counties catching up during the next few months. Pipe line facilities in the western section of the state has been a great boost for development work.

A New York banker who has been making some investigation into the outlook for various industries and who was rather surprised to find out when I looked into the matter that whereas steel production of the country between 1917 and 1918 increased 90 per cent, and production of copper increased 70 per cent, there was an increase of only 30 per cent in production of crude oil. Of course, 1914 was a very poor steel year, and even allowing 25,000,000 and 30,000,000 tons of production, which was normal pre-war output, 22,000,000 tons of steel in 1918 would represent a 60 per cent increase. The fact that over capacity and over production are measures entirely removed from the oil industry is what makes me regard so favorably the future of oil stock in the new industrial era. Then the uses of oil are just beginning to expand—a development of great aid to producers of high grade oil with large gasoline and by-products content.

The outlook for production of automobiles in 1919 is that all manufacturers will soon be back into capacity production. Something less than 1,000,000 cars were manufactured and sold in the United States in 1918 compared with more than 1,700,000 in 1917. While the manufacturers are unanimous in expectation of a big demand for passenger cars this year it would probably be unwise to predict an output for 1919 above 1917, but all indications are that 1920 will be the banner year of the industry, with new records for output in number and value of cars.

Based on an investigation made something over a year ago by the United States Government, it was figured that the average consumption of gasoline by automobile users in the United States is in excess of 400 gallons annually, so that it may be easily estimated to what an increase in the number of automobiles in use would amount in the quantity of gasoline required to supply these cars, to say nothing of the large demand which would come for other oil products essentially necessary to the operation of all kinds of motor vehicles.

There will be a big demand for farm tractors in the coming months and competition in this field will be keen. The General Motors, the Ford Motor Company and the Willys-Overland are large manufacturers of tractors, and the fight will be between these three companies. All three of them expect a heavy export trade.

The pipe line runs for last week were exceedingly encouraging. Approximately 150,000 barrels of oil were shipped out of the Kentucky fields. This of course does not include deliveries in many instances in tank cars and private pipe lines. Activity in the field continues very marked. The weather has been perfect and nothing to interfere with drilling operations. Labor is abundant, and on the whole, the outlook is most promising.

Trading on the Exchange both at Louisville and Lexington has been in great volume, and sensational advances have been made in many of the stocks.

OLD DOMINION, which was quoted in our last market letter at \$215.00, sold on our Louisville Exchange at \$300.00 per share. The buying in this stock is of the investment class, and is a high tribute both to the stock itself and to the earning capacity of Kentucky oil stocks, when the company is intelligently managed and capitalized in keeping with its holdings.

REX has advanced from \$200.00 to \$237.50, with stock very scarce. A dividend of 100 per cent was declared on this stock during the week. The par value of the stock is \$10.00.

FLESHER PETROLEUM COMPANY stock has had a sensational rise. This company is a new comer and the stock subscription books only closed a few days ago, yet the stock has advanced from par to \$1.60, and is eagerly sought for. The company reports a nice well for 75 barrels, and as is well known, the company has 4,000 acres in Lee County, some of it very promising.

PYRAMID had advanced over \$1.00 a share during the past week. It is generally believed that a substantial dividend will be paid upon this stock within the next few weeks.

HIMYAR after slumping from \$1.50 to \$1.00 a share, has on the strength of the bringing in of a good well in Warren County, show an upward tendency, and is selling around \$1.25. The reports received from the well in Warren County are most encouraging.

LINCOLN, which was a drag on the market during the past few weeks at 50c, is eagerly sought after around 75c, with the offerings of a very limited character.

There is some inquiry for McCOMBS around \$1.50.

DUQUESNE is sought at 80c.

MAJESTIC is selling around 32c, with higher prices predicted.

PAN AMERICAN suffered a severe slump, being offered at 40c with no bidders.

Thirty-one completions were reported for the week as follows: Sixteen in Lee from 20 to 500 barrels; five in Estill from 5 to 30 barrels; two in Wayne, one for 100 barrels and the other a gasser; five in Allen from 20 to 100 barrels, one dry; two in Wolfe, one 15 and one 60 barrels, and one in Warren 50 barrels.

The pipe line runs for the week were 113,380 barrels.

FOR SALE

245 Acres, \$735

Six miles south of Scottsville, within one mile of Miller Oil pool and 3 miles of Petroleum pool and 2 miles of where a reported 100-barrel well came in recently.

Nothing to Sell But Oil

Will Buy Good Leases

HUMAN SIDE OF KENTUCKY OIL FIELDS

(Contributed.)

Sometimes we see ourselves as others see us, then we can realize what fools we make of ourselves, and feel that we should go out and kick ourselves for being horn fools. I have watched one oil company in particular in Kentucky. This company was organized in Winchester about eighteen months ago, and has done more to put Kentucky on the map as an oil-producing State than all the other companies in the State.

I had the pleasure of meeting the men who are at the head of this company about one year ago. In my talk with the officers of the company they

told me that their object was to build up an oil company that would live. "We are starting with a small body of land; as we get the money we propose to invest it for our stockholders in the best leases money will buy; we are going to build up a company of which the State will be proud."

Now, let's see if they have kept their word. A few days ago I met a friend from San Francisco, an oil man; the only thing he knew about oil companies in Kentucky was the McCombs Oil Company, now the McCombs Producing & Refining Company. While talking with my friend, a gentleman near us became interested in what was said. He entered into the conversation, remarking, "gentlemen, everywhere I go I hear something about this company." In fact, he said he never knew until he saw their advertisement in a paper that he bought in Van Couver, British Columbia, that Kentucky had an oil field.

Now, you know what I thought—in order to get the news you have to leave home. He stated he had lived within 100 miles of Louisville all his life, then found out in British Columbia that we have an oil field in Kentucky.

In talking to a kicker a few days ago, who knocks on everything good in this world, I said to him, "why kick on the McCombs, why not some of the others," naming a few. He said, "you never hear of them, but what I kick on," he said, "is every time I go to Cincinnati, Cleveland, or Chicago, some fool will ask me something about that big oil company in your town; have they tank cars and a refinery," as though no other companies ever had tank cars or a refinery.

That, I said, puts me in mind of a man who lived in my town in Indiana; he was said to be one of our wealthiest citizens, who was never known to be in favor of anything in the way of improvements; he fought every movement for streets, sewers, or anything else that was for the improvement of our city. If he had nothing else to knock or kick on, it was on another man in our city, who erected more good big buildings, was in everything that helped the city and its people. One day a friend of the progressive citizen said, "why in Sam H— do you find fault with this man; does he ask you to help put up his buildings, does he bother you about helping him in any way?" He then stated, "why, that man is ruining all of us old property owners. Why, every tenant I have wants me to put in steam heat in my buildings; they want laboratories and baths in their houses. If we don't do it, they leave and go to him, and if the fool hasn't it, he will build it for them; why, he will die in the poorhouse; he keeps his name in the papers all the time; you would think that he was the only man in the city."

Now, that is just what is the matter with lots of knockers on the McCombs Company. Just because the McCombs Company is not hiding its work, and is letting the people know that Kentucky has a sure enough oil field. It's president is one of the best known men in the State of Kentucky; in fact, wherever they raise fine cattle, there Abe Renick, like his father and grandfather, is known to be a hustler, and always

up and doing things. That's what he is doing in the oil business. One hundred wells in a year's time; started in a small way, with less than 50 acres improved territory and today they own some of the very best leases in Kentucky, and many more good ones ready as fast as they get the rigs going right after the fluid; and they are paying good, fat dividends.

So you knocker, knock, then watch the McCombs Company grow. You knockers will say then, "I told you so." Everything Abe Renick goes into he makes it a winner.

Say, boys, isn't this a good old world after all; even though some people have more gray matter than the rest of us knockers—while the winners say nothing, and saw wood.

An Oil Proposition

Conducted on a Business Basis for Conservative Business Men and Women

One-half of proceeds from net production set aside to repay to investors their investment in the company, while at the same time they share proportionately in any dividends declared by the Company.

READ THIS CONTRACT WHICH IS MADE WITH STOCK PURCHASERS

This Certifies that there has been filed in the office of the company, the subscription of _____ shares of stock in Hoffman Oil Company of Kentucky, for which was paid the sum of \$_____ in cash and the said purchaser is therefore entitled to participate in proportion to the amount invested, in the special bonus agreement authorized to be made with those who furnish the first \$1,000,000.00 of working capital for Hoffman Oil Company of Kentucky, as follows, to-wit:

- 1st. One-half of the net proceeds from the oil produced from all the wells owned by the company, shall be prorated and distributed quarterly (beginning March 31st, 1919), among the subscribers to this fund until the entire cash investment of each subscriber has been returned in full. "One-half of the net proceeds" shall be construed to mean one-half of all the oil produced and sold by the company—all expenses of production shall be paid from the remaining one-half of such proceeds.
- 2nd. A statement of the production and net proceeds therefrom shall be prepared on March 31st, 1919, and each quarter thereafter, and a copy thereof shall be mailed to the last known address of each of the subscribers to this fund, together with remittance for his or her pro-rata part of the proceeds as herein outlined.
- 3rd. This special "refund" contract shall be issued only to the purchasers of Treasury Stock.
- 4th. The total of all such "SPECIAL REFUND CONTRACTS" so issued shall not exceed \$1,000,000.00.

The intent of the foregoing "Special Contract" is, that those who furnish this \$1,000,000.00 of working capital for early development of the company, will receive a special bonus as above outlined, in addition to their share of the regular profits of the company. The ownership of the stock purchased above, gives the subscriber his full proportionate part of the profits of the company, from whatever source received or made by the company, so long as the subscriber may retain his stock in the company, even after having received back the entire investment in cash, through the "Special Bonus" as outlined in this contract.

The Company already has 24 producing wells. It paid the first 5 per cent to all holders of Refund Certificates on December 31st, and next disbursement will be on March 31st, next. More than 165,000 acres of selected oil and gas leases in Kentucky-Tennessee. Over 6,000 acres in proven oil bearing districts. The Company has recently secured valuable leases in the wonderful "gusher" oil well territory of Texas.

This opportunity is worthy of investigation by the most conservative investors. The Company is conducted on a safe, sane basis by men who have the knowledge, ability and energy to carry the Company through to success in spite of any obstacles. Write for full particulars or call at the office of the Company.

Incorporated

[illegible]

Thirty days ago we had but one producing oil well. In that brief period of time we have acquired two more valuable properties in the "Asherafi" lease in Lee county and the holdings of the May Day Oil Company in the Ross Creek district which we bought two weeks ago. Today we have seven producing wells with prospects of bringing in a new one almost every week. Our present production capacity is over \$500 worth of oil a day, and barring unforeseen disappointments, with the wells drilled and new properties acquired this month we will produce and sell

Frequently the largest profits of great oil companies come from increased values of untraced or "wildcat" acreage. We have fifteen thousand acres of fully selected leases scattered through the States of Kentucky and Tennessee, several hundred acres of which is close to the famous "Big Bird" well on Wolf Creek, in Breathitt county. These pieces of leases, assessed from ten to twenty fold almost overnight, by distributing our leases over a broad territory, we have an opportunity to profit by the drillings of wildcat wells on our leases. A lease, which is worth but a few hundred dollars in fee income, worth thousands of dollars, holds in a few weeks or months. Oil has already been discovered in more than fifty counties of Kentucky. We believe there are greater possibilities of discovering oil in new pools in Kentucky, than in any other State before. Every acre well drilled in the vicinity of any of our lease, has a tendency to raise the value and prospects and possibilities of our own holdings. The selection of our leases must be a wise and careful consideration as to location, geologic formation, and thickness, and conditions, and it is established by the success or presence of oil in a particular tract.

Thompson-Mahoney Oil Company

Incorporated

Producers of Kentucky High-Grade Petroleum

CAPITALIZATION \$200,000.00

THOMPSON-MAHONEY OIL COMPANY was organized
 some months ago by a small group of successful business
 and experienced oil men, for the purpose of developing proven oil
 leases at Oil City, Barren County, Kentucky. A large sum has been spent for drilling equipment,
 machinery, and drilling wells, until today the company is producing and shipping oil, and is
 assured of success. No stock was offered until this success was assured. The directors believe
 that it is a wise business policy to operate more rapidly and thereby increase their production
 and profits; therefore they have authorized the sale of a portion of the treasury stock for the pur-
 pose of purchasing additional drilling equipment. This Company is essentially "A business
 man's Company operated by successful business men and Practical Oil men."

WELL No. 3.
 This well was brought in at 400 feet. It is connected with the pipe line, and pumping oil daily.

First Stock Offering

At Par \$10.00 per Share

5 POINTS

Why this is a conservative
 Business Man's Investment

- PRODUCING—From Five Wells. Two more drilling.
- SMALL CAPITAL—Means large profits from small production.
- LOW COSTS—Shallow depth and ideal location make costs low.
- LARGE INVESTMENT—Own complete drilling and operating equip-ment.
- ABLE MANAGEMENT—By practical oil and successful business men.

BUY NOW—BEFORE OUR PRODUCTION INCREASES

A Dividend will be announced in a short time.
